

特別講演会

PROF. YUAN CHUAN LEE

Department of Biology,
Johns Hopkins University

“How Columbus influenced our dinner table?”

Columbus' discovery of American continents resulted in introduction of many new food items to the Old World. Potato and corn are such examples. Eight of top 26 major crops of the world are originated in the Americas. Many people will be surprised to learn that some of the “local” foods we consume daily are actually of American origin. In return, the Old world also contributed some foods to the New World.
